ASSIGNMENT – 04

Vehicle Service Command Center Page Elements Use Case

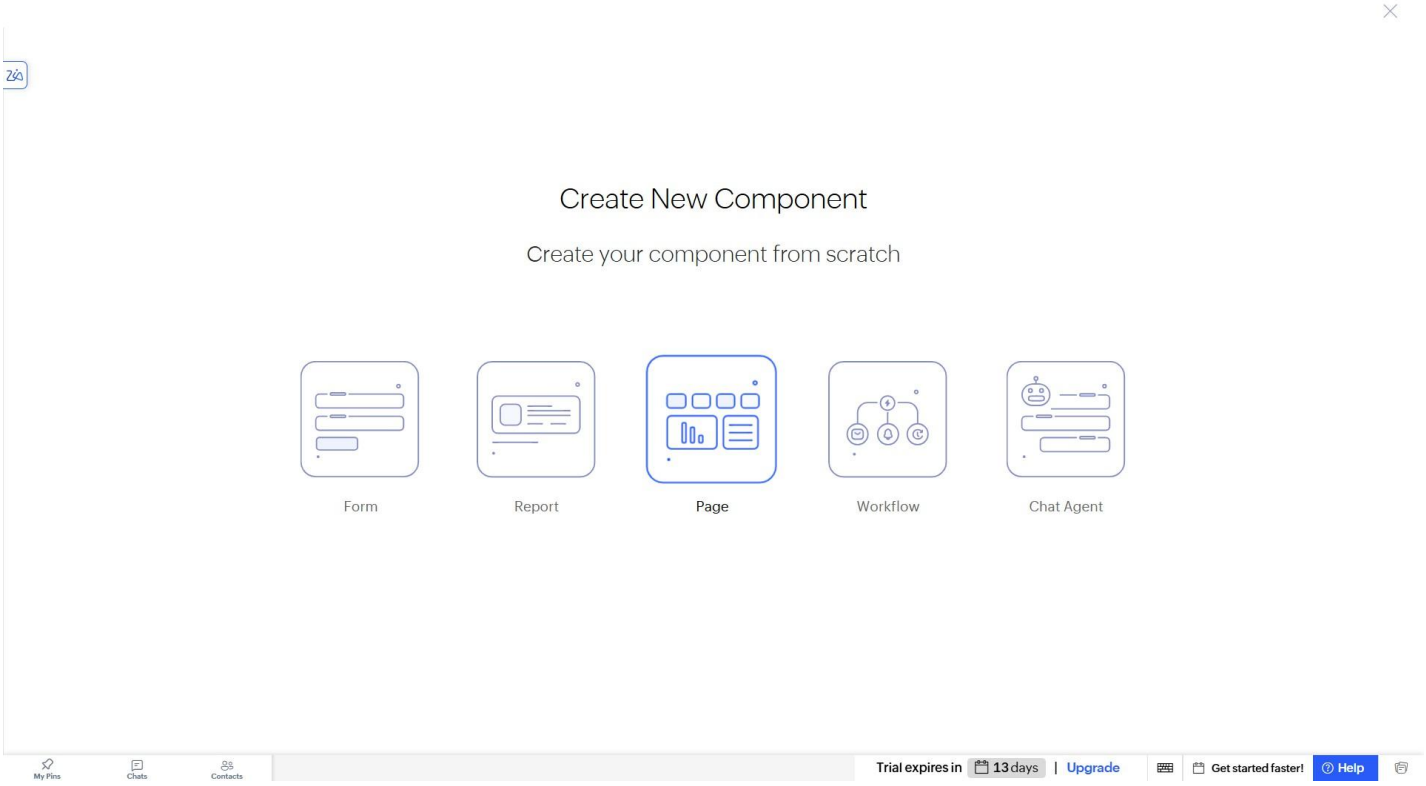

Objective:

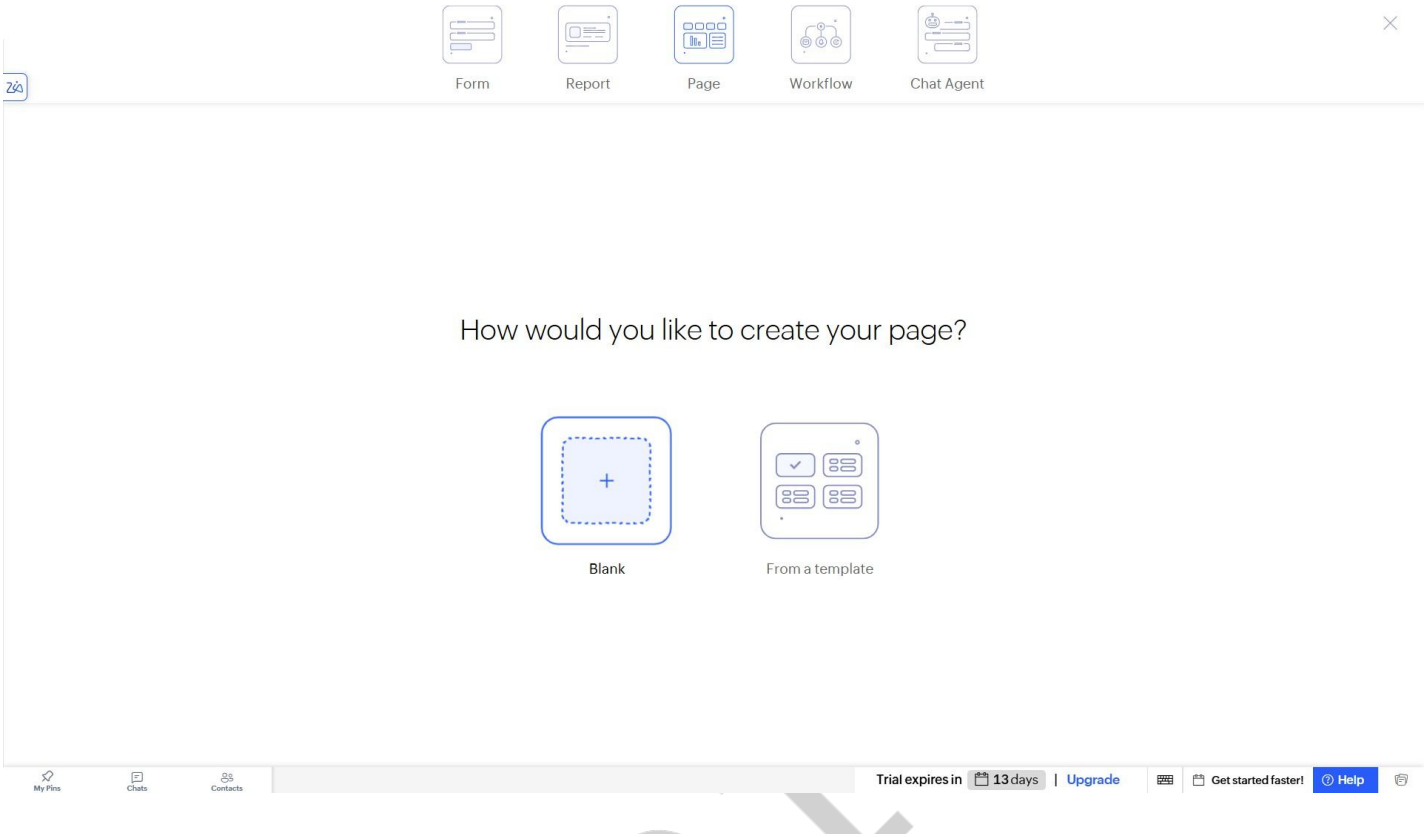

To design and build a single internal "Command Center" Page in Zoho Creator for the existing "Vehicle Service Request" application, demonstrating the correct usage of all eleven Page Builder elements (Panel, Board, Chart, Gauge, Search, Form, Report, Snippets, Button, Widgets, and Viewer) so that the service center staff have one unified workspace to monitor, manage, and act on service request data.

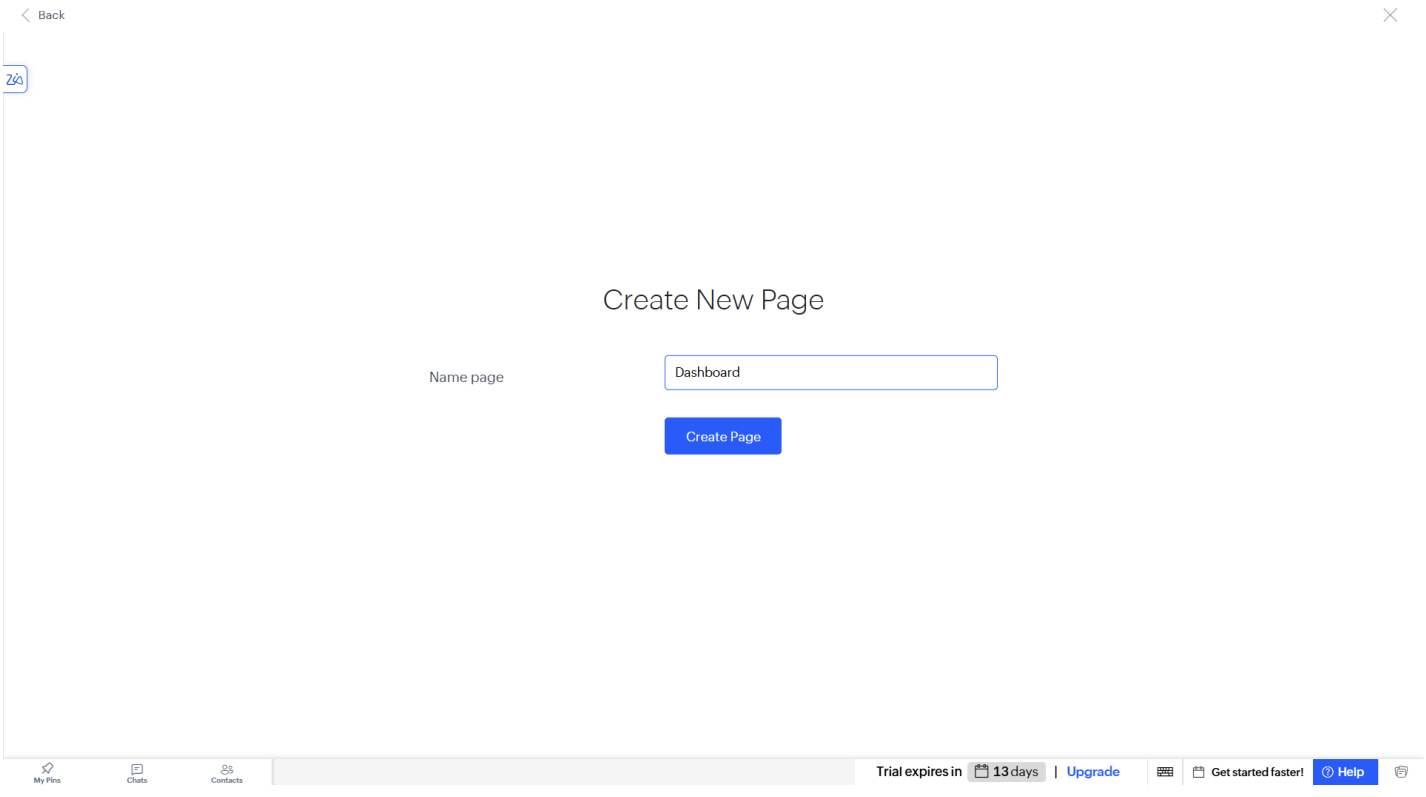

Procedure:

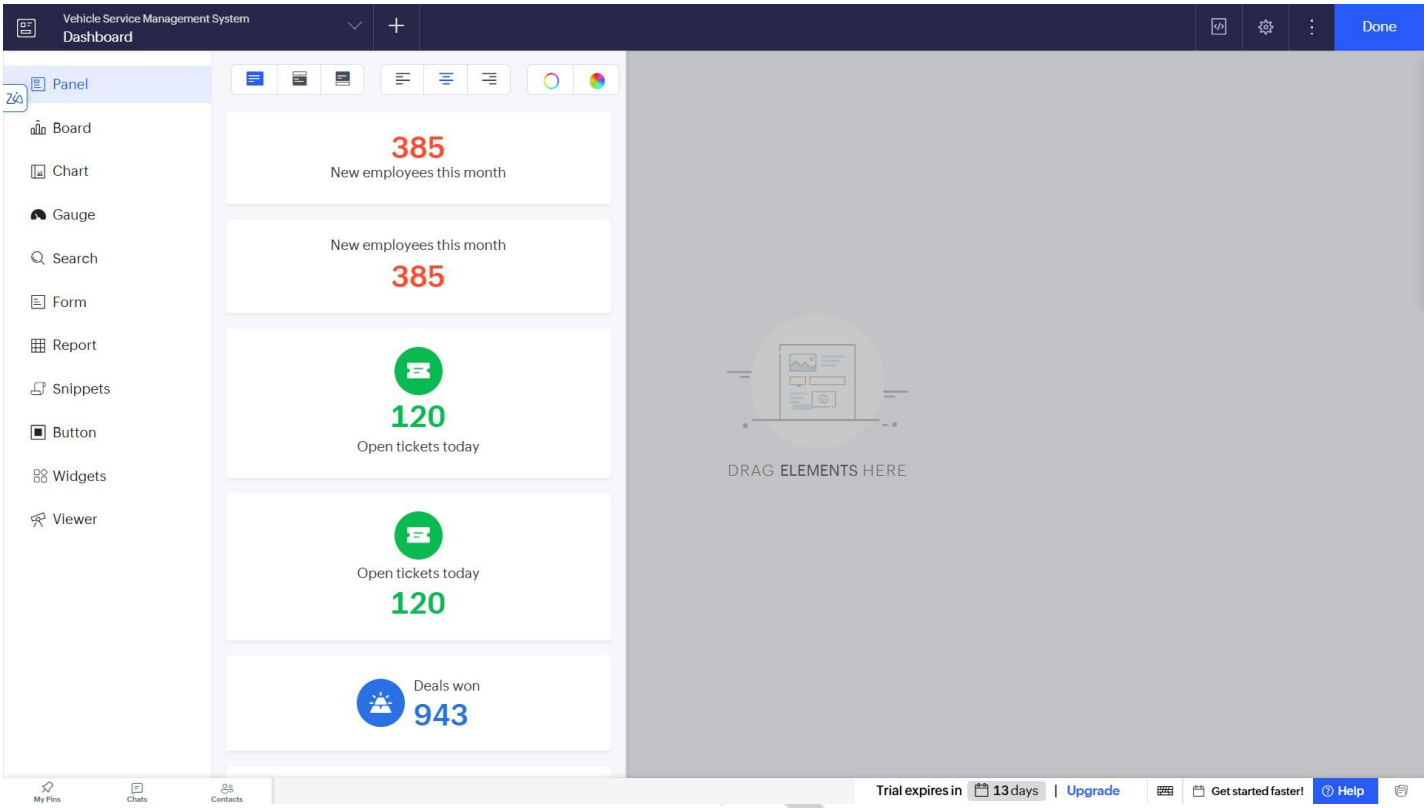

1. Command Center Main Panel Configuration:

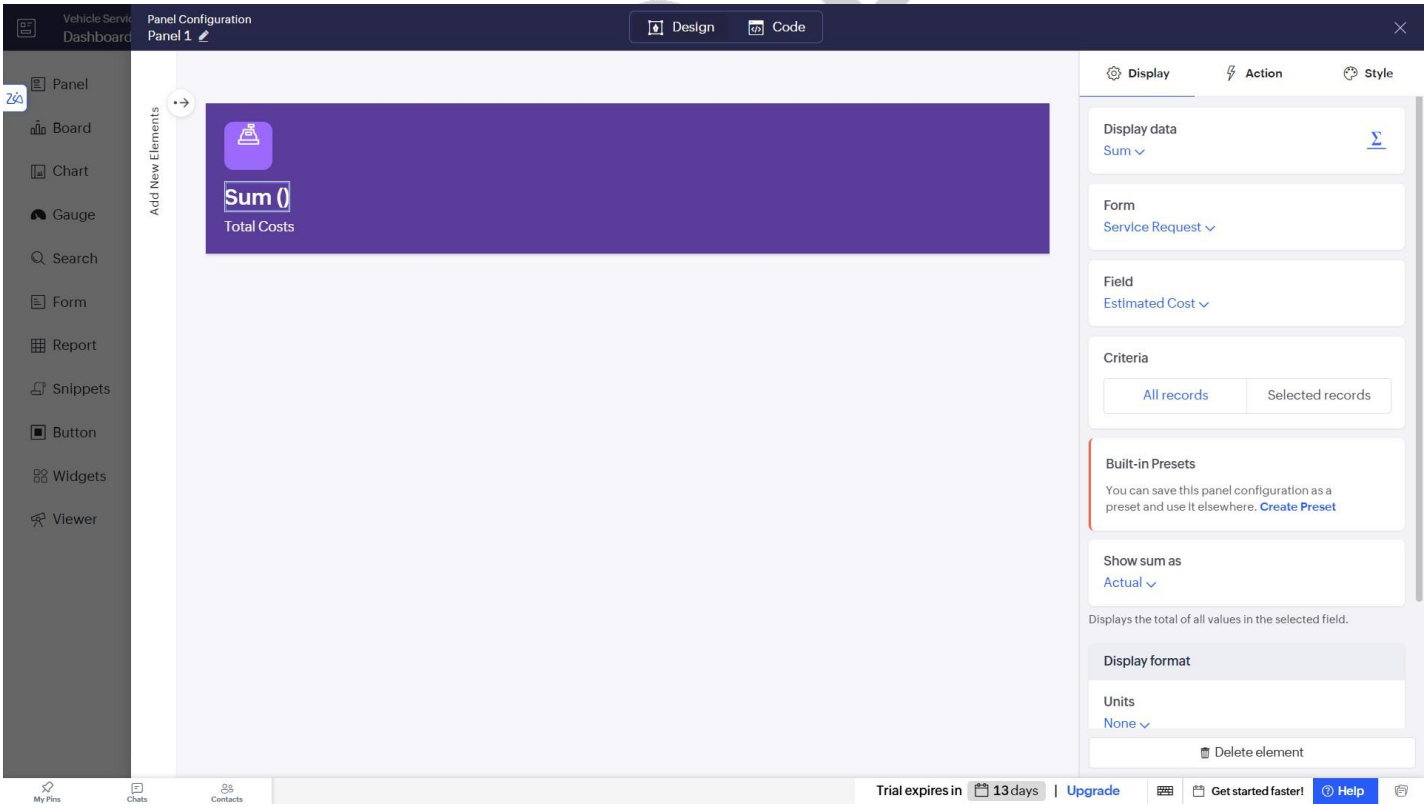

Create the "Service_Command_Center_Page" and add a primary Panel to serve as the structural container that groups all other elements into one cohesive dashboard.

2. Overview Strip Setup (Section 1):

Configure the Daily Bay Utilization Gauge to display live bay occupancy. Add the ServiceType Distribution Chart Widget to visualize service requests as a pie chart. Include a global Vehicle/Owner Search Bar at the top of the page.

3. Processing Workspace Setup (Section 2):

Embed a Kanban-style Service Status Board so staff can drag service request cards across stages (Requested, In Diagnosis, In Repair, Ready for Pickup). Add a Send Ready-for-Pickup Button above the board.

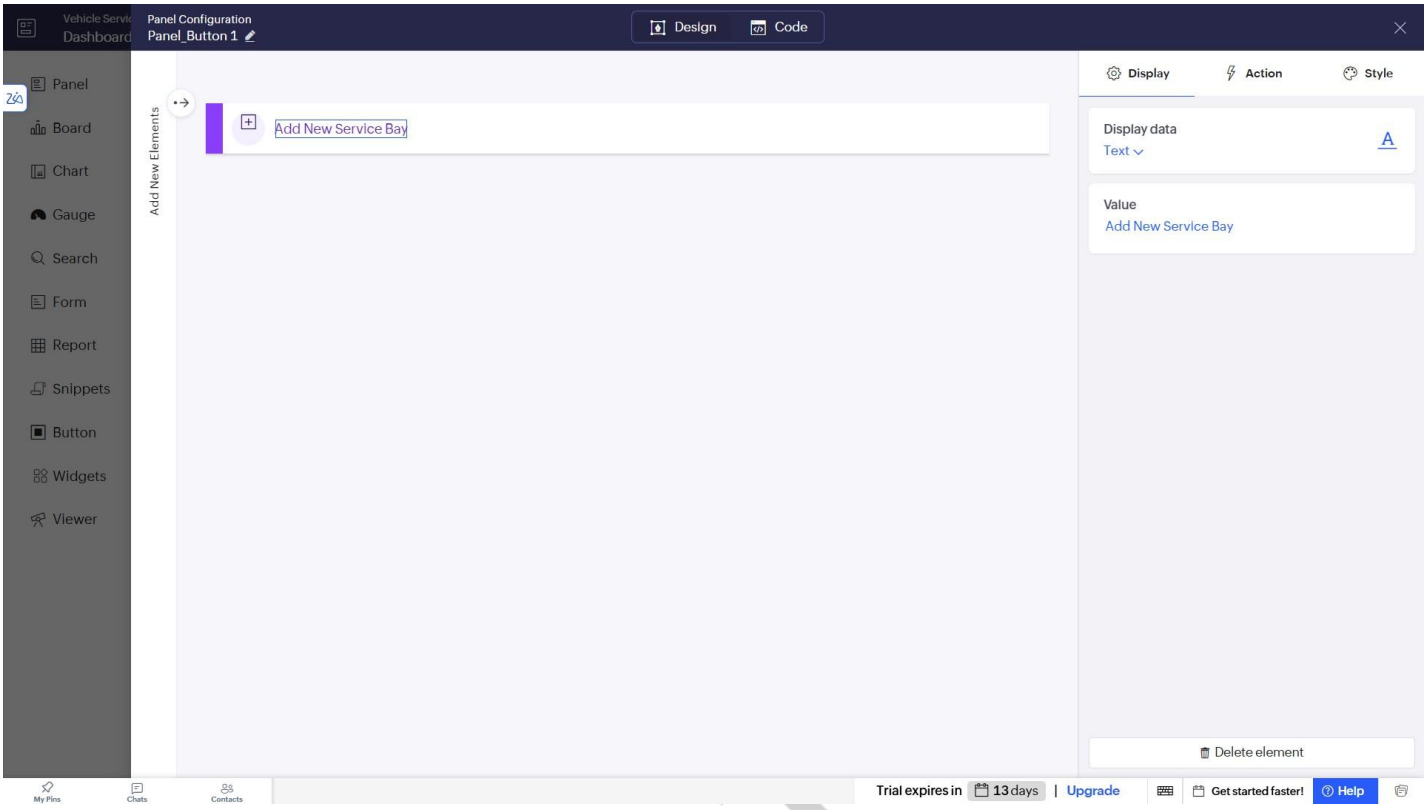

24070

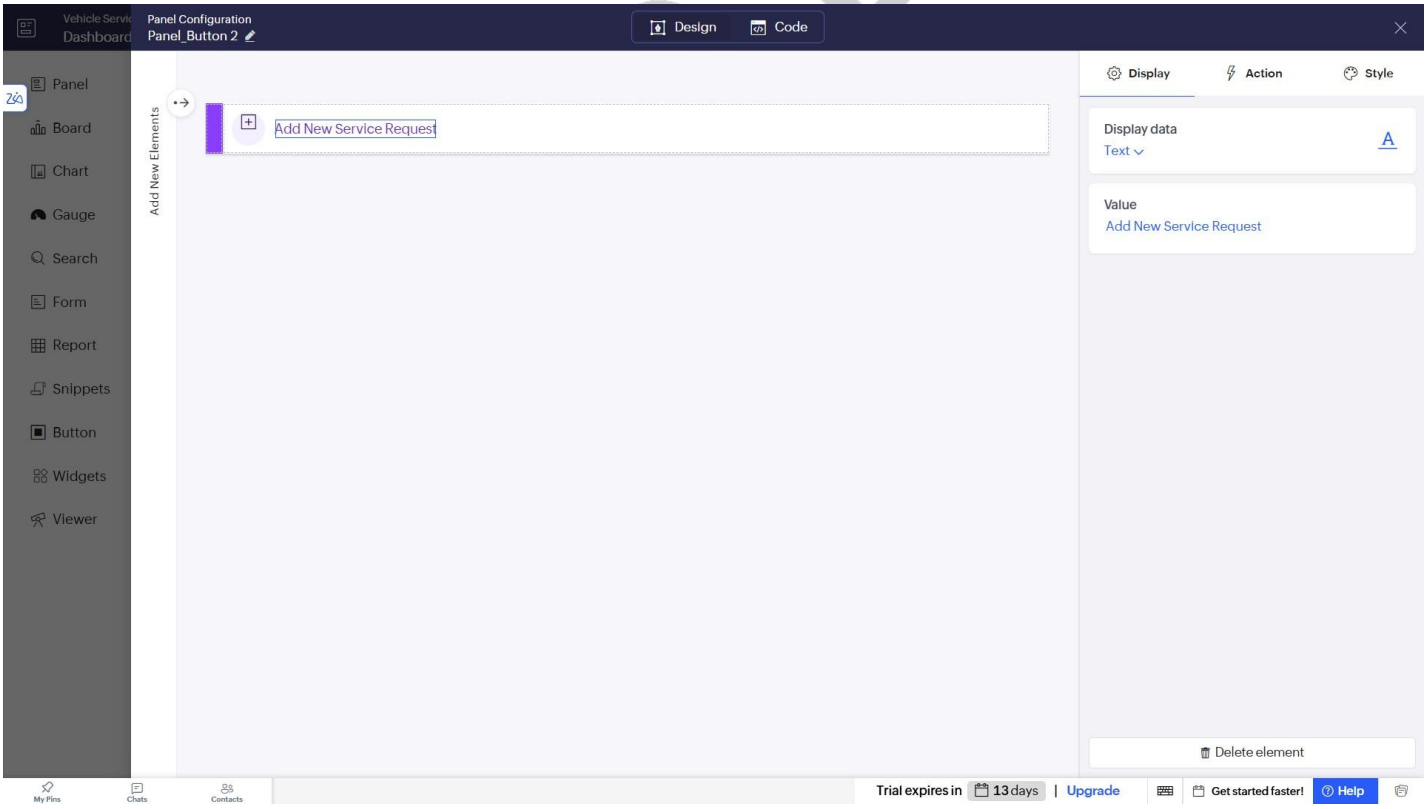

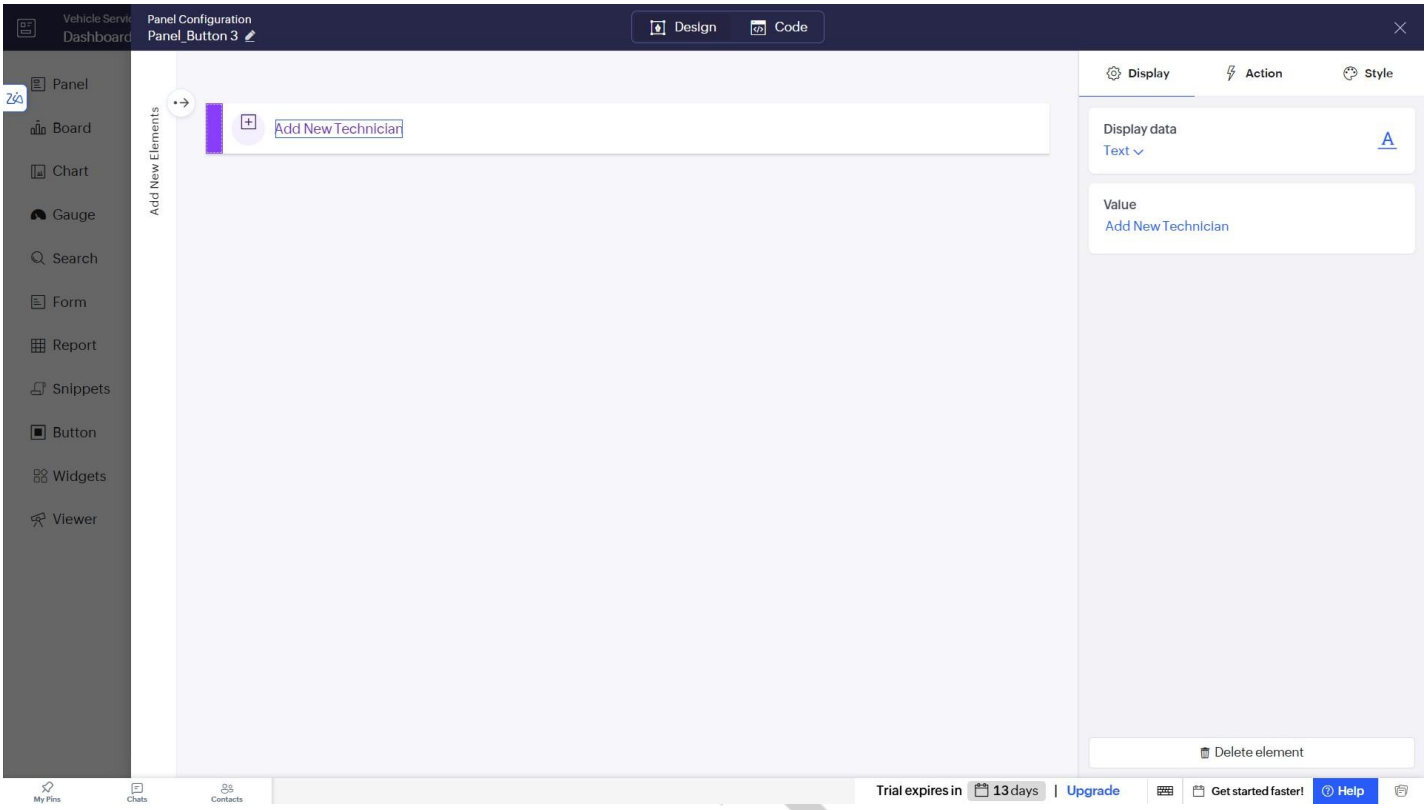

4. Reference & Quick Actions Setup (Sections 3 & 4):

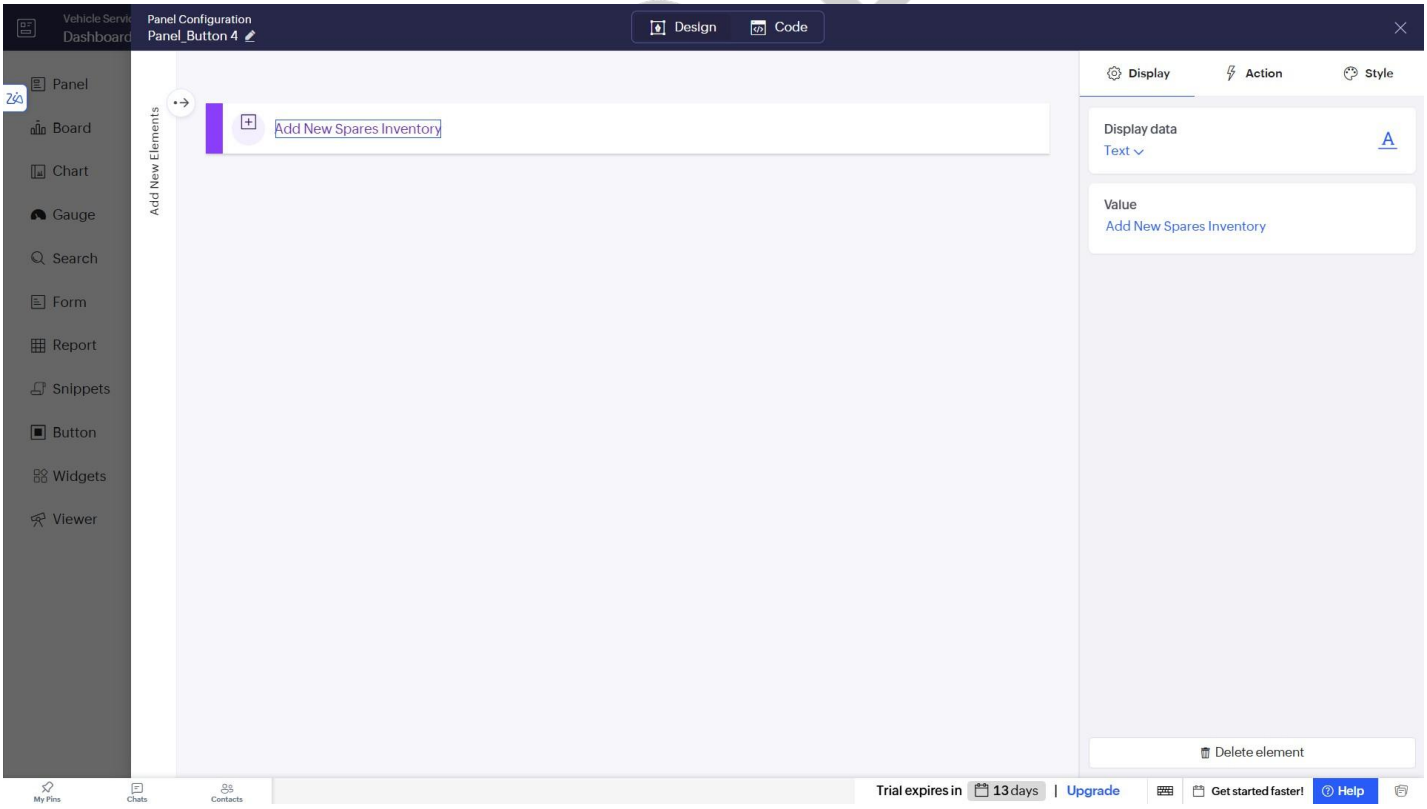

Embed the Full Service Requests Report in the lower section. In the sidebar, embed the Quick Walk-in Service Form, a Service Policy Estimate Snippet for standard text reference, and configure the Insurance Damage Photo Viewer to display related media files inline.
